

Thursday January 9, 2014

7:30a.m. – 5:00p.m.

**ASU Tempe Campus
ISTB 4, Marston Theater**

Catered, open-air lunch in the Biodesign Institute garden

NATIONAL SCIENCE FOUNDATION

PROPOSAL CLINIC

An OKED Research Forum

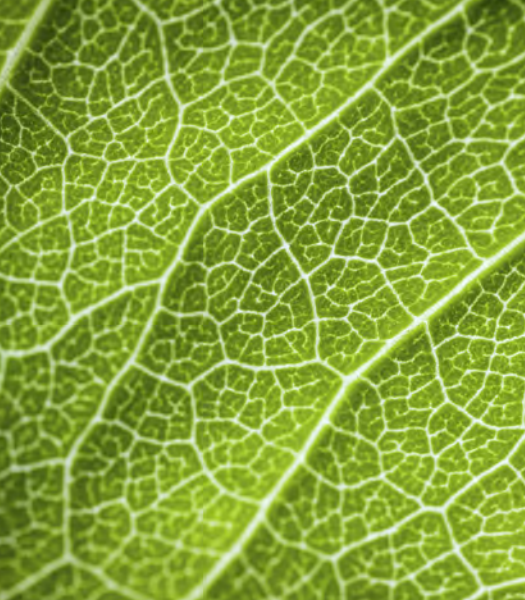

WHO SHOULD ATTEND?

Principal Investigators (PI's) looking to enhance their competitive edge with National Science Foundation (NSF) programs.

WHAT WILL YOU LEARN?

This hands-on workshop will cover two broad areas: proposal planning and the mechanics of writing a compelling proposal. You will:

- Gain insight on NSF programs, funding trends, and long-range strategy
- Leverage your funding and strategic vision
- Discover free and low-cost resources on campus that advance your scientific program goals and enhance your broader impacts
- Get practical experience on creating a compelling message, writing to review panels, and making the most of your budget
- Learn how to develop effective collaborations
- Gain a better understanding of education, broader impacts, and diversity requirements
- Network with other successful faculty and programs at ASU

WHO IS PRESENTING?

Lucy Deckard founded Academic Research Funding Strategies, LLC in 2010. Her company helps academic institutions, faculty and staff develop the expertise in-house to identify funding opportunities, understand funding agencies, and develop successful grant proposals. She has over 10 years of experience in grant writing, with special emphasis on NSF applications in academic environments. For 16 years, she worked as an engineer conducting applied research in industry and obtained funding from DoD, DARPA and the Department of Energy.
